Urgent & important key disclaimer - Spare parts disclaimer

Thank you for your order for Castell replacements or Spare Keys/Spare Parts.

We must draw your attention to the potential danger of using or issuing spare keys/spare parts.

1. Trapped key interlocks control events in a strict sequence. If this sequence is compromised through the use of spare keys/spare parts, the consequences could cause serious or fatal injury to persons or damage to processes and plant. In the wrong hands, keys or spare parts could expose person(s) to the very hazard which the interlocking system has been designed to prevent.
2. Any products with specific safety ratings (including but not limited to Explosion Proof, Environmental, Hazardous Chemical Environment ratings) will no longer be certified under the Castell Safety original declaration after modification by third parties. It is essential that such items are assessed and re-certified by a suitably qualified engineer after modification and before power on. Power on of such products after modification in any way is at the sole risk of the user. Castell Safety International cannot be held responsible in any way for damages resulting to personnel, plant or equipment arising from such activity.
3. Fitting of spare parts or product repairs should be carried out by competent persons suitably qualified for such activity.
4. Movement and use of Keys and spare parts should be carefully controlled and documented to prevent misuse whether intentional or not.

Ordering and fitting of spare parts or keys supplied against any order confirms acceptance by the user of responsibilities as outlined above.

Order number:-

Signed by:-

Print name:-

Job Title:-

Date:-

Acceptable common spare parts (see page 2) – other parts must be referred to engineering & compliance for approval. Repairing and fitting parts by a 3rd party (not by Castell Safety) invalidates 12 month product warranty.
