Covid-19 Statement: 12 January 2021

Important update to Castell Safety International Suppliers and Customers

We continue to monitor closely the developments relating to COVID-19 and the recent changes in status and guidelines issued by the UK Government. Our priorities continue to focus on the well-being of our employees and to provide continuity of supply and support of our safety products to our customers.

I would like to confirm that our manufacturing facilities are functioning in a Covid secure manner to ensure order shipment with minimum disruptions. Our Supply Chain team continue to work hard to ensure raw material orders reflect the current demand and that our suppliers are communicating any potential challenges to us with plenty of notice. Should you wish to contact us, all our normal communication channels are available.

All our teams are operating and remain accessible for online meetings to provide support and discuss requirements for current and future projects. In exceptional circumstances our teams can also conduct essential site visits if absolutely required.

Please also note that, during this period, we are offering our CPD accredited training courses on trapped key interlocking online. For further details visit <https://www.castell.com/training-courses/>

In these difficult times, we remain relentlessly focused on providing you with the best service and support you have come to expect from us. Thank you for the trust you place in our teams and our company.

Your Sincerely,

James Gravestock

Managing Director

Castell Safety International Ltd
